

NATIONAL INSTITUTE OF INFECTIOUS DISEASES & DENGUE SURVEILLANCE

SPECIALIZED VECTOR-BORNE CLINICAL DIAGNOSTICS & HEMATOLOGY DIVISION

Accredited Medical Reference Laboratory • ISO 15189 Certified

Patient ID: PAT-DNG-0004	Patient Name: Suresh Gupta	Age / Sex: 32.0 Y / Male
Contact Phone: +1 73764 77768	Email: sureshgupta.004@medcare-hospital.org	National Aadhaar: 5026 7219 4019
PAN Number: FEWNT4573T	Referring Consultant: Dr. Tariqul Islam, PhD, Pathologist	Sample Type: Whole Blood (EDTA)

DENGUE SEROLOGY & RAPID VIROLOGICAL ASSAYS

Test Parameter	Observed Result	Biological Reference Interval	Clinical Interpretation
Dengue NS1 Antigen (ELISA/Rapid)	POSITIVE	Negative (< 0.90 Index)	Active Dengue Viral Infection
Dengue IgM Antibody	POSITIVE (3.42 Index)	Negative (< 1.00 Index)	Primary Immune Response Active
Dengue IgG Antibody	POSITIVE (2.81 Index)	Negative (< 1.00 Index)	Prior Flavivirus Exposure / Secondary Dengue

HEMATOLOGICAL PARAMETERS & COMPLETE BLOOD COUNT (CBC)

Hematology Parameter	Patient Value	Reference Range	Alert / Clinical Status
Platelet Count (PLT)	82.0 x10 ³ / uL	150 - 450 x10 ³ / uL	CRITICAL: Thrombocytopenia
White Blood Cell (WBC)	5.11 x10 ³ / uL	4.0 - 11.0 x10 ³ / uL	Normal Range
Hematocrit (HCT / PCV)	51.5 %	36.0 - 48.0 %	Hemoconcentration Alert
Red Blood Cell (RBC)	6.39 x10 ⁶ / uL	3.8 - 5.5 x10 ⁶ / uL	Standard
Lymphocytes (%)	47.0 %	20.0 - 40.0 %	Atypical Reactive Lymphocytes
Neutrophils (%)	44.9 %	40.0 - 75.0 %	Normal
Alanine Aminotransferase (ALT)	Not Done	7 - 56 U/L	Normal
Aspartate Aminotransferase (AST)	Not Done	10 - 40 U/L	Normal

TRIAGE CATEGORIZATION & CLINICAL IMPRESSION

WHO Clinical Triage:	Category B (Hemoconcentration Warning - Plasma Leakage Risk)
Critical Findings:	Acute Dengue Viremia (NS1 Antigen detected); Moderate Thrombocytopenia (PLT: 82.0 k/uL < 100 k/uL); Elevated Hematocrit (HCT: 51.5% indicates plasma leakage)
Clinical Management Directive:	Maintain strict fluid balance chart. Monitor CBC every 12-24 hours. Contraindicated: Aspirin, Ibuprofen, NSAIDs due to platelet inhibition. Recommend oral rehydration salts (ORS) or isotonic crystalloid infusion if vomiting persists.

Electronically authenticated laboratory report.
